## PROFESSIONAL SUMMARY

Problem-solving Software Engineer with a background in full stack development through robust technologies. Computer Programming Diploma Graduate from Sheridan. Specialities include: Backend development, Frontend development and Devops

## EDUCATION

### Sheridan College

*Associate's, Computer Science*

- Computer Programming Diploma

**January 2024 - April 2025**

*GPA: 3.6*

## PROFESSIONAL EXPERIENCE

### The Closet Software

*Founder*

- Building a browser extension that integrates AI-powered virtual try-on functionality for online apparel stores, streamlining the fashion e-commerce experience.
- Designing and developing the full-stack architecture using modern web technologies (Vite, Preact, Supabase, and Edge Functions) to support anonymous user sessions and real-time previews.
- Leading the product design and prototyping of The Closet Software, with an early demo available at <https://closet.software>

**Mississauga, ON, Canada**

*September 2025 - Present*

### Google Developer Group Sheridan

*Website Coordinator*

- Working on the official GDG Sheridan Website ([www.gdgsheridan.com](http://www.gdgsheridan.com))
- Built with React, Express, Docker, Github Actions
- Conducting workshops and meetings with students.

**Oakville, ON, Canada**

*September 2024 - May 2025*

### Sheridan College

*Peer Mentor*

- Scheduling 1:1 session with students and providing guidance through their academic life
- Representing Sheridan at college fairs
- Ensuring smooth conduct of event initiatives by Sheridan and other authorities.

**Mississauga, ON, Canada**

*January 2024 - May 2025*

### Dal Moro's Fresh Pasta To-Go

*Supervisor*

- Supervising front staff, inventory management and cashflow management

**Mississauga, ON, Canada**

*June 2024 - Present*

## PROJECTS

### nocaps - [Link to project](#)

*Full Stack Developer*

- Built a CLI tool for summarizing runtime errors and suggesting fixes with a clever tone.
- Used Auth0 PKCE + localhost for authorization
- Built the API on express

**Mississauga, ON, Canada**

*July 2025 - August 2025*

### Conscient - [Link to project](#)

*Dev Ops Engineer*

- Built an AI-driven platform offering personalized emotional support through adaptive conversations, integrating a secure digital diary with progress tracking.
- Designed a peer-matching system using Groq AI for extensive machine learning, leveraging networking protocols to securely connect users with shared experiences.
- Used MongoDB Atlas to deploy the database for the project.

**Ottawa, ON, Canada**

*January 2025 - Present*

### Multi Knives - [Link to project](#)

*Indie Game developer*

- Used C# with Unity Game Engine and Photoshop to develop a fully functional mobile game.
- Learned core programming concepts like OOPs and basics of DSA as well as the functionalities of Unity Game Engine.
- Used Photoshop to develop the sprites for the project.
- Early project (age 14), not hosted on GitHub as I had not begun using it yet.

**Remote**

*January 2020 - April 2021*

## TECHNOLOGIES

**Frontend:** AngularJS, React.js, Figma, Tailwind, SCSS, HTML/CSS

**Backend:** Express.js, .NET, Node.js, Spring Boot, Flask, MySQL, Postgres, NoSQL, Supabase, Deno.js

**Programming Languages:** Java, JavaScript, Python, C#, OOP, TypeScript, Kotlin

**Devops:** AWS, Github Actions, JIRA, Docker, Git, Bash, Linux/Unix
